The Able Doctor

...that they used to hide in the woods, and even if they were discovered, they would not fight back. However, they were not content to live in hiding, so they started to plan their escape. They had heard of a place called 'The Atlantic Ocean' where they could find freedom, so they decided to try and make their way there. But they were not like other men, they had the strength and courage to face any danger. They followed in the footsteps of your subordinates, and in England, they were not happy with the treatment they received. They decided to take matters into their own hands, and in America, they were not afraid to fight for their rights.
